

The Infrastructure Investment and Jobs Act will Deliver for Virginia

President Biden and Vice President Harris support the Senate's passage of the Infrastructure Investment and Jobs Act, the largest long-term investment in our infrastructure and competitiveness in nearly a century. **The need for action in Virginia is clear and recently released state-level data demonstrates that the Infrastructure Investment and Jobs Act will deliver for Virginia.** For decades, infrastructure in Virginia has suffered from a systemic lack of investment. The historic Infrastructure Investment and Jobs Act will make life better for millions of Virginia residents, create a generation of good-paying union jobs and economic growth, and position the United States to win the 21st century. Specifically, the Infrastructure Investment and Jobs Act will:

- **Repair and rebuild our roads and bridges with a focus on climate change mitigation, resilience, equity, and safety for all users, including cyclists and pedestrians.** In Virginia there are 577 bridges and over 2,124 miles of highway in poor condition. Since 2011, commute times have increased by 7.7% in Virginia and on average, each driver pays \$517 per year in costs due to driving on roads in need of repair. **Based on formula funding alone, Virginia would expect to receive \$7 billion for federal-aid highway apportioned programs and \$537 million for bridge replacement and repairs under the Infrastructure Investment and Jobs Act over five years¹.** Virginia can also compete for the \$12.5 billion Bridge Investment Program for economically significant bridges and nearly \$16 billion of national funding in the bill dedicated for major projects that will deliver substantial economic benefits to communities.
- **Improve healthy, sustainable transportation options for millions of Americans.** Virginians who take public transportation spend an extra 72.2% of their time commuting and non-White households are 1.6 times more likely to commute via public transportation. 10% of trains and other transit vehicles in the state are past useful life. **Based on formula funding alone, Virginia would expect to receive \$1.2 billion over five years under the Infrastructure Investment and Jobs Act to improve public transportation options across the state².**
- **Build a network of EV chargers to facilitate long-distance travel and provide convenient charging options.** The U.S. market share of plug-in electric vehicle (EV) sales is only one-third the size of the Chinese EV market. The President believes that must change. The bill invests \$7.5 billion to build out the first-ever national network of EV chargers in the United States and is a critical element in the Biden-Harris Administration's plan to accelerate the adoption of EVs to address the climate crisis and

support domestic manufacturing jobs. **Under the Infrastructure Investment and Jobs Act, Virginia would expect to receive \$106 million over five years to support the expansion of an EV charging network in the state³. Virginia will also have the opportunity to apply for the \$2.5 billion in grant funding dedicated to EV charging in the bill.**

- **Help connect every American to reliable high-speed internet.** 9.7% of Virginians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 39.4% of Virginians live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 13.3% of Virginia households do not have an internet subscription. **Under the Infrastructure Investment and Jobs Act, Virginia will receive a minimum allocation of \$100 million to help provide broadband coverage across the state, including providing access to the at least 473,000 Virginians who currently lack it. And, under the Infrastructure Investment and Jobs Act, 1,908,000 or 23% of people in Virginia will be eligible for the Affordability Connectivity Benefit, which will help low-income families afford internet access.**

Over the coming days and weeks, we will expect to receive additional data on the impact of the Infrastructure Investment and Jobs Act in Virginia.
